FROM : DAD/S&amp;D

SUBJECT:

25X1A

I note that the people at [REDACTED] are thinking about going into the San Diego area in order to find a strong S-band signal area. I would think that there are plenty of S-band signals around in the Los Angeles area and we ought to see if they can't do the job near at home. I also think that in terms of describing what the equipment can do that a regular design task is better than hauling it out into an unknown environment.
